

**Platform:** iOS

**Price:** Free

**Launch Date:** July 9th, 2015

**Creator:** YoVivo Limited

**Description:**

YoVivo! is the photo app that lets you seamlessly manage all your photos and videos from one place, regardless of where they're stored in the cloud. With YoVivo! you can download and upload photos from your favorite cloud site or social network, share across multiple networks, create polished slideshows, and encrypt your images for maximum privacy from the comfort of your smartphone.

**Features:**

- **Access on the go** - Easily find, browse, and transfer your photos and videos between your Camera Roll and multiple clouds and social networks. YoVivo! supports Facebook, Instagram, Flickr, Picasa, DropBox, Google Drive and OneDrive.
- **Slideshow creator** - Create polished presentations of your pictures on the fly. YoVivo! lets you edit images, apply filters, add text, emoji and set slideshows to your favorite music track. Share them with friends or openly on the YoVivo platform.
- **Sharing simplified** - Share your snaps and videos across multiple networks, in one post with just a few taps.
- **Easy encryption** - Secure your privacy through one-touch encryption as you upload picture and video files to clouds of choice.
